PROFESSIONAL EXPERIENCE

Excellence Technology

Chandigarh

Summer Internship, WEB Development

May 2024 – July 2024

- Gained practical experience in full-stack web development using HTML, CSS, JavaScript, and React.
- Designed and developed a personal project from scratch, applying front-end and back-end development concepts..
- Collaborated with team members to build responsive and user-friendly web interfaces..
- Learned version control using Git and GitHub for effective project collaboration and management.

PROJECTS

Apple-Clone-Website

- Developed a responsive Apple homepage clone using **HTML and CSS**, replicating design and layout elements.
- Collected visual assets, fonts, and layout materials to ensure design accuracy and consistency.
- Implemented page structure and content linking for a seamless user experience.
- Focused on clean design practices and cross-device compatibility during development.

StopWatch

- Developed an interactive stopwatch application using **React**, focusing on user-friendly UI and visual appeal.
- Integrated **animations**, **sound effects**, and dynamic transitions to enhance the user experience.
- Designed a responsive layout and styled components to ensure an engaging and modern look.
- Focused on intuitive functionality and smooth performance across different devices.

JobDescriptionQuestion-Maker - <https://jobdescriptionquestions.netlify.app/>

- Developed a responsive **AI-powered interview preparation tool** using React and TypeScript, with a full-stack architecture.
- Engineered key features, including **generating custom interview questions and practice quizzes** from a job description and storing them for user review.
- Implemented robust user authentication and data storage via **Supabase**, a backend-as-a-service.
